evonicfires

quality electric fires built in britain

e-series

The **e-series** is our award winning modern day range of built in electric fires, powered by the very latest LED lighting technology.

The simplicity of the **e-series** enables absolute freedom to create and design individual feature fireplaces, as it is electrical there are no limitations to where a **e-series** product can be installed.

With a choice of effect sizes, from 500mm to 1800mm as well as two or three sided glass models the **e-series** offers greater scope and choice to any installation.

The **evoflame®** effect gives the impression of a deep and rich flame picture with a hot ash effect fuel bed via its unique reflectivity.

The flame picture which is produced using LED's can provide up to 50,000 hours of running time. It is fully adjustable through the high and low settings when using the optional remote control.

The **evoflame ultra hd®** has the same features as the **evoflame®**, but utilises the latest in non reflective **SCHOTT CONTURAN® MAGIC** glass technology.

Additionally it features a unique flicker effect that adds realism and movement to the fuel bed.

ULTRAHD

evoflame[®]
technology

e500gf3

Both **evoflame®** & **evoflame ultra hd®** products come as standard with **e-touch®** control system, hand painted ceramic logs with the added realism of vermiculite and embers.

e-touch

The **e-touch®** allows complete controllability of any **e-series** product. The control system is a fully portable, rechargeable bluetooth based touch screen unit, featuring a built-in thermostat enabling you to regulate and maintain the selected room temperature with ease.

SCHOTT CONTURAN® MAGIC

evoflame ultra hd® products use **SCHOTT CONTURAN® MAGIC** glass that has optical interference properties, and is coated to reduce surface reflections optically by up to 90% making the glass appear invisible.
