

MAZONA
— STOVES —

2026

Welcome to the Mazona Stoves Range 2026 /27

For over 30 years we have been manufacturing quality multi fuel stoves at affordable prices. Our range of stoves continues to expand and adapt to ensure we can offer unique stoves designed by our team of experts. Whether you opt for one of our traditional models like the Portland inset, or one of our contemporary designs such as the Callan freestanding with log store or plinth base, you will be sure to find the perfect Mazona stove to bring warmth to your home at an affordable price.

Efficiency & Regulations

All our stoves are put through a series of tests to ensure they meet ecodesign regulations which were put in place in 2022 to improve air quality. This ensures our stoves are highly efficient, releasing fewer particulate emissions than traditional open fires and are suitable to install in the UK and Ireland.

Our Retailer network

Our stoves are available to purchase from independent retailers throughout Ireland. Each retailer has their own showroom where you can see our stoves on display, often burning so you can get a real feel for our stoves.

Our retailers are experts in their field and will help guide you to ordering the perfect Mazona stove for your home as well as helping you with the installation process.

Mazona Stove Features

All of our stoves come with a 5-year warranty on the stove body and a 1-year warranty on selected parts, starting from the date of purchase. For full details, please refer to your stove's user manual.

We keep a wide range of spare parts in stock for both current models and selected discontinued stoves, so you can enjoy peace of mind long after your purchase. Working closely with our trusted retailers, we're proud to provide dedicated after-sales support to help keep your Mazona stove performing beautifully for years to come.

For even more protection, register your stove at Mazonastoves.com to receive an extended parts warranty.

All our stoves meet and often surpass ecodesign regulations. This means our stoves are highly efficient and burn fewer particulate emissions than traditional open fires or older stove models.

To ensure your stove burns as cleanly as possible it is important you choose the correct fuel. If you are burning wood ensure you purchase kiln dried logs with less than 20% moisture. If you are burning solid fuel ensure you use smokeless solid fuel.

If you purchase a stove with a nominal output over 5kW or live in a new build house which are commonly airtight, you may need to opt for a direct air connection when installing your stove. This is to ensure the stove can get the required air needed for combustion. All our models allow for a direct air connection. Each Mazona stove will either be direct air ready or direct air compatible with an additional direct air kit.

---------------	----

A brand new edition to the Mazona range in 2026, the Claridge is an eco design stove with over 78% efficiency in both the 5kW & 8kW models.

The body of the stove incorporates the air controls & handle to give a clean finish to the stoves aesthetic.

Brand new for 2026, available in two outputs

Flush air controls & handle mean the design of the stove is uninterrupted.

Mazona Claridge
with GMS Valence

A contemporary stove with a 4.9kW output available in two configurations. Choose between the log store base; perfect for storing fuel ready for burning, or the pedestal option which elevates the stove body for a modern freestanding installation.

The Callan will create a striking focal point in your space no matter which version you opt for.

Contemporary freestanding design ideal for installing without a fireplace

Choose between the log store or pedestal base to suit your own home

Direct air ready

Scan to see a video of the Callan

Scandinavian influence makes the multifuel Orka stand out as a uniquely designed stove. Tapered legs & curved edges echo a simplistic art deco style ensuring the Orka will be a focal point in your home.

A 5kW output ensures the Orka offers a generous heat output, while its high 82.5% efficiency rating ensures harmful particulate emissions are burnt off in the stove chamber.

The optional log store gives the Orka a boost of height, making it perfect for a freestanding installation

Black or Grey editions available to allow you to choose the perfect finish to fit your style

MAZONA

Fully cast iron, the Shelbourne offers brilliant heat retention in 5kW, 8kW or the new 10kW model with an efficiency class across all three models of A.

Traditional elements such as stepped detailing on the door of the stove give a timeless look to the stove while modern eco design credentials ensure a cleaner burn.

Fully cast iron body & door provides excellent heat retention keeping you warm longer

Attractive reeded vermiculite bricks alongside detailing on the door and stove body offer a traditional feel

The large arched door offers a large picture window to view the flames

**ABSTRACT
MINIMALISM**

Nr. 283

The Ashford is an attractive portrait style stove with uninterrupted views of the flame picture. Both the 5kW & 8kW editions are available in a black or grey finish.

Stepped detailing on the door frame add texture to the stoves body while black air controls & handle complete the sleek design of the Ashford.

Large portrait door offers excellent flame picture view

Over 79% efficiency rating giving a cleaner burn

Both outputs are available in a grey or black finish

Scan to see a video of the Ashford

One of our most popular stoves, the Newport is a sleekly designed multi-fuel stove with optional log stores available for both the 5kW & 7kW editions.

The Newport will seamlessly suit both a fireplace or freestanding installation making it a very versatile stove for a modern home.

Burn your choice of kiln dried wood or smokeless solid fuel

Optional log stores will add height to your stove installation while also providing fuel storage

Both models have an A EEI Class rating with over 78% efficiency

Scan to see a video of the Newport

Mazona Newport
with GMS Bordeaux

Updated for 2026 the popular Glencara range now has black air controls and handles in all three outputs with a 5kW widescreen edition coming soon.

The 4kW option is perfect for smaller spaces while the 5kW & 8kW models will generously heat bigger living rooms. The larger models also have the option of a log store to give the stove added height.

Available in three outputs; 4kW, 5kW & 8kW with a 5kW widescreen edition coming soon

Updated black air controls and door handle give the stove a contemporary look

Each Glencara model has an EEI Class rating of A
